SMART Vaccines--Strategic Multi-Attribute Ranking Tool for Vaccines--is a prioritization software tool developed by the Institute of Medicine that utilizes decision science and modeling to help inform choices among candidates for new vaccine development. A blueprint for this computer-based guide was presented in the 2012 report *Ranking Vaccines: A Prioritization Framework: Phase I*.

Ranking Vaccines: A Prioritization Software Tool, Phase II extends the proof-of-concept presented in the Phase I report, which was based on multi-attribute utility theory. This report refines a beta version of the model developed in the Phase I report and presents its next iteration, SMART Vaccines 1.0.

Ranking Vaccines: Phase II discusses the methods underlying the development, validation, and evaluation of SMART Vaccines 1.0. It also discusses how SMART Vaccines should--and, just as importantly, should not--be used. The report also offers ideas for future enhancements for SMART Vaccines as well as for ideas for expanded uses and considerations and possibilities for the future.

From reader reviews:

Cathy Spearman:

Hey guys, do you really want to find a new book to learn? Maybe the book with the subject Ranking Vaccines: A Prioritization Software Tool: Phase II: Prototype of a Decision-Support System suitable to you? Often the book was written by famous writer in this era. Typically the book titled Ranking Vaccines: A Prioritization Software Tool: Phase II: Prototype of a Decision-Support System is the main one of several books which everyone reads now. This book has inspired many people in the world. When you read this review you will enter the new way of measuring that you never know ahead of. The author explained their concept in a simple way, consequently all of people can easily know the core of this e-book. This book will give you a great deal of information about this world now. To help you see the representation of the world in this book.

Andrew Martin:

Are you kind of an active person, only have 10 or maybe 15 minutes in your day to upgrade your mind skill or thinking skill perhaps analytical thinking? Then you have a problem with the book that can't satisfy your short time to read it because this all time you only find a book that needs more time to be learned. Ranking Vaccines: A Prioritization Software Tool: Phase II: Prototype of a Decision-Support System can be your answer given it can be read by a person who has those short time problems.

John Pierre:

You could spend your free time to read this book in your spare time. This Ranking Vaccines: A Prioritization Software Tool: Phase II: Prototype of a Decision-Support System is simple to deliver you can read it in the park, your car, in the beach, train and soon. If you did not get much space to bring the printed book, you can buy often the e-book. It makes you quicker to read it. You can save typically the book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

Ronald Malone:

Many people said that they feel bored stiff when they read a book. They are directly felt it when they get a half of the book. You can choose typically the book Ranking Vaccines: A Prioritization Software Tool: Phase II: Prototype of a Decision-Support System to make your reading is interesting. Your own skill of reading talent is developing when you just like reading. Try to choose a straightforward book to make you enjoy to study it and mingle the sensation about book and looking at especially. It is to be an initial opinion for you to like to open a book and examine it. Besides that the e-book Ranking Vaccines: A Prioritization Software Tool: Phase II: Prototype of a Decision-Support System can be your brand new friend when

you're truly feel alone and confuse with what must you're doing of these time.
