Modelling High-level Cognitive Processes Richard P. Cooper With Contributi, Peter G. Yule, John Fox, David W. Glasspool

This book is a practical guide to building computational models of high-level cognitive processes and systems. High-level processes are those central cognitive processes involved in thinking, reasoning, planning, and so on. These processes appear to share representational and processing requirements, and it is for this reason that they are considered together in this text.

The book is divided into three parts. Part I considers foundational and background issues. Part II provides a series of case studies spanning a range of cognitive domains. Part III reflects upon issues raised by the case studies. Teachers of cognitive modeling may use material from Part I to structure lectures and practical sessions, with chapters in Part II forming the basis of in-depth student projects.

All models discussed in this book are developed within the COGENT environments. COGENT provides a graphical interface in which models may be sketched as "box and arrow" diagrams and is both a useful teaching tool and a productive research tool. As such, this book is designed to be of use to both students of cognitive modeling and active researchers. For students, the book provides essential background material plus an extensive set of example models, exercises and project material. Researchers of both symbolic and connectionist persuasions will find the book of interest for its approach to cognitive modeling, which emphasizes methodological issues. They will also find that the COGENT environment itself has much to offer.

From reader reviews:

Mary McCollum:

The ability that you get from Modelling High-level Cognitive Processes is the more deep you rooting the information that hide into the words the more you get interested in reading it. It does not mean that this book is hard to understand but Modelling High-level Cognitive Processes giving you thrill feeling of reading. The article author conveys their point in a number of way that can be understood by simply anyone who read the item because the author of this book is well-known enough. That book also makes your vocabulary increase well. It is therefore easy to understand then can go with you, both in printed or e-book style are available. We highly recommend you for having this specific Modelling High-level Cognitive Processes instantly.

James Collins:

Hey guys, do you wants to finds a new book you just read? May be the book with the headline Modelling High-level Cognitive Processes suitable to you? Often the book was written by renowned writer in this era. Typically the book untitled Modelling High-level Cognitive Processes is one of several books that will everyone read now. This particular book was inspired many people in the world. When you read this guide you will enter the new dimension that you ever know ahead of. The author explained their thought in the simple way, consequently all of people can easily to comprehend the core of this book. This book will give you a lot of information about this world now. So that you can see the represented of the world in this particular book.

Cassandra Giron:

Spent a free time to be fun activity to complete! A lot of people spent their free time with their family, or their very own friends. Usually they accomplishing activity like watching television, likely to beach, or picnic within the park. They actually doing same every week. Do you feel it? Would you like to something different to fill your own personal free time/ holiday? Might be reading a book may be option to fill your free time/ holiday. The first thing that you will ask may be what kinds of book that you should read. If you want to consider look for book, may be the guide untitled Modelling High-level Cognitive Processes can be fine book to read. May be it may be best activity to you.

Anne Corchado:

Do you have something that you prefer such as book? The reserve lovers usually prefer to decide on book like comic, short story and the biggest you are novel. Now, why not striving Modelling High-level Cognitive Processes that give your pleasure preference will be satisfied simply by reading this book. Reading addiction all over the world can be said as the means for people to know world far better then how they react toward the world. It can't be said constantly that reading addiction only for the geeky particular person but for all of you who wants to become success person. So , for every you who want to start examining as your good habit, you are able to pick Modelling High-level Cognitive Processes become your personal starter.
