## **Rocket and Spacecraft Propulsion (Springer Praxis Books)** Martin J. L. Turner

The revised edition of this practical, hands-on book discusses the range of launch vehicles in use today throughout the world, and includes the very latest details of some of the advanced propulsion systems currently being developed. The author covers the fundamentals of the subject, from the basic principles of rocket propulsion and vehicle dynamics through the theory and practice of liquid and solid propellant motors, to new and future developments. The revised edition will stick to the same principle of providing a serious exposition of the principles and practice of rocket propulsion, but from the point of view of the user and enquirer who is not an engineering specialist. Most chapters will remain substantially the same as the first edition; they will be updated where necessary and errata corrected. The main revisions will be to the chapter on electric propulsion where there have been significant new developments both in engine types and in practical applications. This is now seen as the key to planetary exploration by robotic probes and should therefore be reflected. Nuclear propulsion has emerged from the doldrums and is now seen as a definite possibility for outer solar system robotic exploration; and as enabling technology for a human mars expedition. A new chapter on nuclear thermal propulsion has been added to reflect this revival of interest.

### **From reader reviews:**

#### **Johnny Powers:**

In this 21st one hundred year, people become competitive in each and every way. By being competitive currently, people have do something to make these individuals survives, being in the middle of the actual crowded place and notice by means of surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. Yep, by reading a e-book your ability to survive enhance then having chance to stand up than other is high. For you personally who want to start reading the book, we give you this Rocket and Spacecraft Propulsion (Springer Praxis Books) book as nice and daily reading guide. Why, because this book is usually more than just a book.

#### **Maria Gardner:**

Reading a guide tends to be new life style within this era globalization. With studying you can get a lot of information that will give you benefit in your life. Together with book everyone in this world could share their idea. Books can also inspire a lot of people. Many author can inspire their reader with their story as well as their experience. Not only the story that share in the publications. But also they write about advantage about something that you need illustration. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that you can get now. The authors nowadays always try to improve their expertise in writing, they also doing some investigation before they write for their book. One of them is this Rocket and Spacecraft Propulsion (Springer Praxis Books).

#### **Donna Young:**

Reading a book to become new life style in this 12 months; every people loves to go through a book. When you examine a book you can get a large amount of benefit. When you read guides, you can improve your knowledge, due to the fact book has a lot of information upon it. The information that you will get depend on what forms of book that you have read. If you would like get information about your review, you can read education books, but if you want to entertain yourself you can read a fiction books, such us novel, comics, and also soon. The Rocket and Spacecraft Propulsion (Springer Praxis Books) provide you with a new experience in examining a book.

#### **Cherry Simard:**

As we know that book is essential thing to add our knowledge for everything. By a e-book we can know everything we really wish for. A book is a set of written, printed, illustrated or perhaps blank sheet. Every year had been exactly added. This publication Rocket and Spacecraft Propulsion (Springer Praxis Books) was filled regarding science. Spend your extra time to add your knowledge about your scientific disciplines competence. Some people has various feel when they reading a book. If you know how big benefit of a book, you can feel enjoy to read a reserve. In the modern era like now, many ways to get book you wanted.
