Delivering Development: Globalization's Shoreline and the Road to a Sustainable Future Edward R. Carr

In *Delivering Development*, author Edward Carr calls into question the very universal, unquestioned assumptions about globalization, development, and environmental change that undergird much of development and economic policy. Here he demonstrates how commonly held beliefs about globalization and development have failed the global poor. Over his 13 years of working along what he calls "globalization's shoreline," a world region buffeted by the economic, political, and environmental decisions of those living in wealthier places, Carr has concluded that most experts misunderstand what they are trying to fix, and cannot tell if they are fixing it. *Delivering Development* is an eye opening, you-are-there book that compels the reader to question conventional wisdom, redefines what assistance to the developing world really means, and explores alternative ways of achieving meaningful, enduring improvements to human well-being.
