Nanomaterials and Devices (Micro and Nano Technologies)

Donglu Shi

Nanomaterials and Devices (Micro and Nano Technologies) Donglu Shi

Introducing the fields of nanomaterials and devices, and their applications across a wide range of academic disciplines and industry sectors, Donglu Shi bridges knowledge acquisition and practical work, providing a starting point for the research and development of applications.

The book describes characterization of nanomaterials, their preparation methods and performance testing techniques; the design and development of nano-scale devices; and the applications of nanomaterials, with examples taken from different industry sectors, such as lighting, energy, bioengineering and medicine / medical devices.

Key nanomaterial types are covered, such as carbon nanotubes, nanobiomaterials, nano-magnetic materials, semiconductor materials and nanocomposites. Shi also provides detailed coverage of key emerging technologies such as DNA nanotechnology and spintronics. The resulting text is equally relevant for advanced students (senior and graduate) and for engineers and scientists from a variety of different academic backgrounds working in the multi-disciplinary field of nanotechnology.

- Provides detailed guidance for the characterization of nanomaterials, their preparation, and performance testing
- Explains the principles and challenges of the design and development of nano-scale devices
- Explores applications through cases taken from a range of different sectors, including electronics, energy and medicine.

From reader reviews:

Ruth Brinkman:

What do you ponder on book? It is just for students because they're still students or it for all people in the world, what best subject for that? Simply you can be answered for that query above. Every person has different personality and hobby for every other. Don't to be pushed someone or something that they don't want do that. You must know how great along with important the book Nanomaterials and Devices (Micro and Nano Technologies). All type of book would you see on many resources. You can look for the internet resources or other social media.

Kenneth Roberts:

Information is provisions for people to get better life, information nowadays can get by anyone in everywhere. The information can be a understanding or any news even a concern. What people must be consider when those information which is within the former life are challenging to be find than now's taking seriously which one is suitable to believe or which one typically the resource are convinced. If you have the unstable resource then you get it as your main information it will have huge disadvantage for you. All those possibilities will not happen inside you if you take Nanomaterials and Devices (Micro and Nano Technologies) as your daily resource information.

Karen Plum:

People live in this new morning of lifestyle always attempt to and must have the extra time or they will get great deal of stress from both lifestyle and work. So , if we ask do people have free time, we will say absolutely indeed. People is human not really a robot. Then we consult again, what kind of activity have you got when the spare time coming to you of course your answer will certainly unlimited right. Then do you try this one, reading guides. It can be your alternative throughout spending your spare time, typically the book you have read is definitely Nanomaterials and Devices (Micro and Nano Technologies).

Eric Freeman:

The book untitled Nanomaterials and Devices (Micro and Nano Technologies) contain a lot of information on it. The writer explains your girlfriend idea with easy method. The language is very clear to see all the people, so do not necessarily worry, you can easy to read it. The book was authored by famous author. The author will take you in the new time of literary works. It is possible to read this book because you can read more your smart phone, or product, so you can read the book throughout anywhere and anytime. If you want to buy the e-book, you can wide open their official web-site along with order it. Have a nice go through.
