Robust Libor Modelling and Pricing of Derivative Products (Chapman and Hall/CRC Financial Mathematics Series) John Schoenmakers

One of Riskbook.com's Best of 2005 - Top Ten Finance Books

The Libor market model remains one of the most popular and advanced tools for modelling interest rates and interest rate derivatives, but finding a useful procedure for calibrating the model has been a perennial problem. Also the respective pricing of exotic derivative products such as Bermudan callable structures is considered highly non-trivial. In recent studies, author John Schoenmakers and his colleagues developed a fast and robust implied method for calibrating the Libor model and a new generic procedure for the pricing of callable derivative instruments in this model.

Within a compact, self-contained review of the requisite mathematical theory on interest rate modelling, *Robust Libor Modelling and Pricing of Derivative Products* introduces the author's new approaches and their impact on Libor modelling and derivative pricing. Discussions include economically sensible parametrisations of the Libor market model, stability issues connected to direct least-squares calibration methods, European and Bermudan style exotics pricing, and lognormal approximations suitable for the Libor market model.

A look at the available literature on Libor modelling shows that the issues surrounding instability of calibration and its consequences have not been well documented, and an effective general approach for treating Bermudan callable Libor products has been missing. This book fills these gaps and with clear illustrations, examples, and explanations, offers new methods that surmount some of the Libor model's thornier obstacles.

From reader reviews:

Antonia Wagner:

In this 21st millennium, people become competitive in every single way. By being competitive today, people have to do something to make all of them survive, being in the middle of often the crowded place and notice by surrounding. One thing that occasionally many people have underestimated that for a while is reading. Yep, by reading a book your ability to survive rises then having a chance to stand than others is high. To suit your needs who want to start reading some sort of book, we give you this Robust Libor Modelling and Pricing of Derivative Products (Chapman and Hall/CRC Financial Mathematics Series) book as nice and daily reading book. Why, because this book is greater than just a book.

Floyd Hatfield:

Typically the book Robust Libor Modelling and Pricing of Derivative Products (Chapman and Hall/CRC Financial Mathematics Series) has a lot associated with it. So when you read this book you can get a lot of help. The book was written by the very famous author. This author makes some research ahead of writing this book. That book is very easy to read you can find the point easily after looking over this book.

Douglas Leverette:

Reading can be called a head hangout, why? Because if you are reading a book particularly a book entitled Robust Libor Modelling and Pricing of Derivative Products (Chapman and Hall/CRC Financial Mathematics Series) your brain will drift away through every dimension, wandering in every single aspect that maybe unfamiliar for but surely will become your mind friends. Imagine just about every word written in a guide then become one contact form conclusion and explanation that maybe you never get just before. The Robust Libor Modelling and Pricing of Derivative Products (Chapman and Hall/CRC Financial Mathematics Series) giving you another experience more than blown away your brain but also giving you useful data for your better life within this era. So now let us demonstrate the relaxing pattern at this point is your body and mind will be pleased when you are finished reading through it, like winning a casino game. Do you want to try this extraordinary investing spare time activity?

Valarie Chamberlin:

You can obtain this Robust Libor Modelling and Pricing of Derivative Products (Chapman and Hall/CRC Financial Mathematics Series) by check out the bookstore or Mall. Just viewing or reviewing it could possibly be your solve problem if you get difficulties for the knowledge. Kinds of this reserve are various. Not only by means of written or printed but in addition can you enjoy this book by means of e-book. In the modern era similar to now, you just looking by your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your book. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose suitable ways for you.
