Reclaiming Science from Darwinism: A Clear Understanding of Creation, Evolution, and Intelligent Design Kenneth Poppe

Foreword: William Dembski, PhD.

Darwinism is a 150-year-old icon that has been propped up by unproven suppositions. The scientific discoveries of the last few decades are now kicking out the props.

Dr. Kenneth Poppe is convinced the icon is ready to topple. Providing extensive scientific evidence of Darwinism's failures, this career biology instructor uses enlightening analogies and examples to explain the theory's problems:

blind luck assembly of the first cell
mathematical improbabilities
the laws of thermodynamics
hypothetical sudden mutations
biased mind-sets

Spiced with humor and helpful graphics, this popularly targeted text shows readers that in regard to objections to evolution the science is truly there.

A superior resource for students, parents, and private or public school educators.
