Siegfried Wagner, Werner Hanke, Arndt Bode, Franz Durst

High Performance Computing in Science and Engineering, Munich 2004 Siegfried Wagner, Werner Hanke, Arndt Bode, Franz Durst

Leading-edge research groups in the field of scientific computing present their outstanding projects using the High Performance Computer in Bavaria (HLRB), Hitachi SR8000-F1, one of the top-level supercomputers for academic research in Germany. The projects address modelling and simulation in the disciplines Biosciences, Chemistry, Chemical Physics, Solid-State Physics, High-Energy Physics, Astrophysics, Geophysics, Computational Fluid Dynamics, and Computer Science. The authors describe their scientific background, their resource requirements with respect to top-level supercomputers, and their methods for efficient utilization of the costly high-performance computing power. Contributions of interdisciplinary research projects that have been supported by the Competence Network for Scientific High Performance Computing in Bavaria (KONWIHR) complete the broad range of supercomputer research and applications covered by this volume.

From reader reviews:

Manuel Thomas:

Do you have favorite book? If you have, what is your favorite's book? Guide is very important thing for us to find out everything in the world. Each book has different aim or perhaps goal; it means that reserve has different type. Some people sense enjoy to spend their time and energy to read a book. These are reading whatever they have because their hobby will be reading a book. Consider the person who don't like looking at a book? Sometime, individual feel need book once they found difficult problem as well as exercise. Well, probably you should have this High Performance Computing in Science and Engineering, Munich 2004.

James Barclay:

Spent a free time to be fun activity to complete! A lot of people spent their leisure time with their family, or all their friends. Usually they undertaking activity like watching television, planning to beach, or picnic inside park. They actually doing same every week. Do you feel it? Would you like to something different to fill your current free time/ holiday? Could possibly be reading a book may be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of reserve that you should read. If you want to test look for book, may be the publication untitled High Performance Computing in Science and Engineering, Munich 2004 can be great book to read. May be it might be best activity to you.

Linda Henderson:

The book untitled High Performance Computing in Science and Engineering, Munich 2004 contain a lot of information on it. The writer explains her idea with easy technique. The language is very easy to understand all the people, so do certainly not worry, you can easy to read that. The book was written by famous author. The author gives you in the new period of literary works. It is easy to read this book because you can read more your smart phone, or model, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site and order it. Have a nice go through.

Carol Williams:

You may spend your free time to learn this book this reserve. This High Performance Computing in Science and Engineering, Munich 2004 is simple to bring you can read it in the park your car, in the beach, train in addition to soon. If you did not include much space to bring the particular printed book, you can buy often the e-book. It is make you easier to read it. You can save often the book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.
