## **Aspects of Littorinid Biology: Proceedings of the Fifth International Symposium on Littorinid Biology, held in Cork, Ireland, 7-13 September 1996 (Developments in Hydrobiology)**

Members of the family Littorinidae are among the most widely studied gastropod molluscs and the more questions we answer about this group, the more questions are inevitably posed. Littorinid research spans diverse disciplines, from molecular biology, physiology, ecology, systematics and evolutionary biology to elegant anatomical studies. The papers in this volume reflect the current research being carried out on littorinids, and fall into three broad themes: systematics, ecology, and pollution studies.

This book is primarily targeted at the research level, while providing useful information for advanced first-degree students conducting research projects.
