Electronic Theft: Unlawful Acquisition in Cyberspace

Peter Grabosky, Russell G. Smith, Gillian Dempsey

Electronic Theft: Unlawful Acquisition in Cyberspace Peter Grabosky, Russell G. Smith, Gillian Dempsey

When this book was first published in 2001, the convergence of communications and computing had begun to transform Western industrial societies. Increasing connectivity was accompanied by unprecedented opportunities for crimes of acquisition. The fundamental principle of criminology is that crime follows opportunity, and opportunities for theft abound in the digital age. *Electronic Theft* named, described and analysed the range of electronic and digital theft, and constituted the first major survey of the field. The authors covered a broad list of electronic misdemeanours, including extortion, defrauding governments, telephone fraud, securities fraud, deceptive advertising and other business practices, industrial espionage, intellectual property crimes, and the misappropriation and unauthorised use of personal information. They were able to capture impressively large amounts of data internationally from both scholarly and professional sources. The book posed and attempted to answer some of the pressing questions to do with national sovereignty and enforceability of laws in 2001.
